**Environmental Microbiology - Colilert Profile**

**Method: SM 9223B**

**Test Name: Colilert**

| Analyte                   | Test Result | Analyst       | Date       |
|---------------------------|-------------|---------------|------------|
| Total Coliform, Colilert  | Absent      | Susan Beasley | 02/03/2016 |
| <i>E. coli</i> , Colilert | Absent      | Susan Beasley | 02/03/2016 |

**Report Date:** 02/03/2016

**Reported By: Susan Beasley**

**Explanations of Coliform Analysis:**

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
