Environmental Microbiology - Colilert Profile **Method: SM 9223B**

Test Name: Colilert

| Analyte | Test Result | Analyst | Date |
|---------------------------|--------------------|----------------|-------------|
| Total Coliform, Colilert | Absent | Darneice Owens | 03/06/2015 |
| <i>E. coli</i> , Colilert | Absent | Darneice Owens | 03/06/2015 |

Report Date: 03/09/2015

Reported By: Susan Beasley

Explanations of Coliform Analysis:

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
