**Environmental Microbiology - Colilert Profile** **Method: SM 9223B**

**Test Name: Colilert**

<b>Analyte</b>	<b>Test Result</b>	<b>Analyst</b>	<b>Date</b>
Total Coliform, Colilert	Absent	Darneice Lyons	03/22/2012
<i>E. coli</i> , Colilert	Absent	Darneice Lyons	03/22/2012

**Report Date:** 03/22/2012

**Reported By:** Susan Beasley

**Explanations of Coliform Analysis:**

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
