Sample Description:

Comment:

Environmental Microbiology - Colilert Profile Method: SM 9223B

Test Name: **Colilert**

| Analyte | Test Result | Analyst | Date |
|---------------------------|-------------|-------------------|------------|
| Total Coliform, Colilert | Absent | Denise Richardson | 04/14/2016 |
| <i>E. coli</i> , Colilert | Absent | Denise Richardson | 04/14/2016 |

Report Date: 04/15/2016

Reported By: Susan Beasley

Explanations of Coliform Analysis:

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
