Environmental Microbiology - Colilert Profile

Method: SM 9223B

Test Name: Colilert

| Analyte                   | Test Result | Analyst           | Date       |
|---------------------------|-------------|-------------------|------------|
| Total Coliform, Colilert  | Absent      | Denise Richardson | 04/23/2015 |
| <i>E. coli</i> , Colilert | Absent      | Denise Richardson | 04/23/2015 |

Report Date: 04/23/2015

Reported By: Susan Beasley

Explanations of Coliform Analysis:

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
