Comment:

**Environmental Microbiology - Colisure Profile**

Method: SM 9223B

Test Name: **Water - Colisure**

Analyte	Test Result	Analyst	Date
Total Coliform, Colisure	Present	DBLYONS	05/16/2014
<i>E. coli</i> , Colisure	Absent	DBLYONS	05/16/2014

Report Date: 05/21/2014

Reported By: **Susan Beasley**

**Explanations of Coliform Analysis:**

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
