Environmental Microbiology - Colilert Profile**Method:** SM 9223B**Test Name: Colilert**

| Analyte | Test Result | Analyst | Date |
|---------------------------|-------------|----------------|------------|
| Total Coliform, Colilert | Absent | Darneice Lyons | 06/11/2010 |
| <i>E. coli</i> , Colilert | Absent | Darneice Lyons | 06/11/2010 |

Report Date: 06/14/2010**Reported By:** Susan Beasley**Explanations of Coliform Analysis:**

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
