**Environmental Microbiology - Colisure Profile** **Method:** SM 9223B

---

**Test Name:** Water - Colisure

<b>Analyte</b>	<b>Test Result</b>	<b>Date</b>
Total Coliform, Colisure	Absent	06/21/2018
<i>E. coli</i> , Colisure	Absent	06/21/2018

**Report Date:** 06/22/2018

**Reported By:** Susan Beasley

**Explanations of Coliform Analysis:**

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
