Susan Beasley

ES Microbiology ID:

Sample Source: **New Well**

Well Permit Number:

GPS Number:

Sampling Point: **Well head**

17100106801

Sample Description:

Comment: Sample collection time given by phone per Rhonda Deflour.

Environmental Microbiology - Colilert Profile

Method: SM 9223B

Test Name: **Colilert**

Analyte	Test Result	Date
Total Coliform, Colilert	Present	08/03/2017
<i>E. coli</i> , Colilert	Absent	08/03/2017

Report Date: 08/07/2017

Reported By: **Susan Beasley**

Explanations of Coliform Analysis:

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
