Environmental Microbiology - Colilert Profile

Method: SM 9223B

Test Name: **Colilert**

Analyte	Test Result	Date
Total Coliform, Colilert	Present	12/09/2016
<i>E. coli</i> , Colilert	Absent	12/09/2016

Report Date: 12/09/2016

Reported By: **Susan Beasley**

Explanations of Coliform Analysis:

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
