Sample had leaked when received and caused possible sample contamination. Code date: 09-17-18

**Tetracycline Profile** Method: SM-Dairy

Analyte	Test Result	Unit	Conclusion	Date Tested
Tetracycline	Not Tested			
Note: Analyte(s) 'Unsatisfa	actory' because container leaked.			

Report Date: 09/19/2018 Reported By: **Susan Beasley** 

## **Explanations of Coliform Analysis:**

If coliform bacteria are Absent, the water is considered safe for drinking purpose. If coliform bacteria are Present, the water is considered unsafe for drinking purpose. Presence of E. coli (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
