0.89 mg/L

Disinfectant Used: Sodium hypochlorination Comments:

PWS - Colilert Profile

Disinfectant Used:

Method: SM 9223B **Test Result** Unit Conclusion **Date Tested Analyte Total Coliform** Absent 02/14/2019 E. coli Absent 02/14/2019

Report Date: 02/15/2019 **Susan Beasley** Reported By:

Free Chlorine:

Explanations of Coliform Analysis:

If coliform bacteria are Absent, the water is considered safe for drinking purpose. If coliform bacteria are Present, the water is considered unsafe for drinking purpose. Presence of E. coli (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
