PWS - HPC Profile

Method: SM 9215B

Analyte	Test Result	Unit	Conclusion	Date Tested
Heterotrophic Plate Count	60	CFU/mL		10/06/2020

Report Date: 10/08/2020

Reported By: **KPLEMMONS**

Explanations of Coliform Analysis:

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
