Analyte	Test Result	Unit	Conclusion		Date Tested	
Total Coliform E. coli	Absent Absent			07/22/2021 07/22/2021		

Report Date:

THE STATE OF

07/26/2021

Reported By: **KPLEMMONS**

Explanations of Coliform Analysis:

If coliform bacteria are Absent, the water is considered safe for drinking purpose. If coliform bacteria are Present, the water is considered unsafe for drinking purpose. Presence of E. coli (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
