PWS - Colilert Profile					M	ethod: SM 9223B	
Analyte	Test Result	Unit	Conclusion		Date Tested		
Total Coliform	Absent					08/05/2021	
E. coli	Absent				08	3/05/2021	

Explanations of Coliform Analysis:

STAT

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
