Total Coliform	absent				12/20/2023	
E. coli	absent				12	2/20/2023
Report Date: 12/22/2023		Reported	By: CGOFORTH			

North Carolina State Laboratory of Public Health

Environmental Sciences

Explanations of Coliform Analysis:

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
