Sample Type:

Sample Location: outside spigot

Location Type:

Location Code: 114

Disinfectant Used:

Free Chlorine:

Total Chlorine:

Comments: System Type: NP. Disinfectant Used: None.

**PWS - Colilert Profile**

**Method: SM 9223B**

| Analyte        | Test Result | Unit | Conclusion | Date Tested |
|----------------|-------------|------|------------|-------------|
| Total Coliform | Absent      |      |            | 06/05/2024  |
| E. coli        | Absent      |      |            | 06/05/2024  |

**Report Date:** 06/06/2024

**Reported By:** **KPLEMMONS**

**Explanations of Coliform Analysis:**

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
