Disinfectant Used:	Free Chlorine: 1.01 mg/L	Total Chlorine:	
Comments: Disinfectant Used: Chlorine (liq.)			

PWS - Colilert Profile

Method: SM 9223B

Analyte	Test Result	Unit	Conclusion	Date Tested
Total Coliform	Not Tested			
E. coli	Not Tested			

Note: Analyte(s) 'Unsatisfactory' because invalid sample. Water bacteriological samples must be collected on Mon, Tues or Wed with receipt no later than Thurs..

Report Date: 06/28/2024

Reported By: **KPLEMMONS**

Explanations of Coliform Analysis:

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
