Report Date: 11/02/2024 Report

Absent

Absent

Reported By: DNEWBORN

Explanations of Coliform Analysis:

Total Coliform

E. coli

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
