Disinfectant Used:	Free Chlorine: 0.41 mg/L	Total Chlorine:	

Comments: Disinfectant Used: Hypochlorination

**PWS - Colisure Profile**

**Method: SM 9223B**

Analyte	Test Result	Unit	Conclusion	Date Tested
Total Coliform	Absent			05/14/2026
E. coli	Absent			05/14/2026

**Report Date:** 05/19/2026

**Reported By:** CTUTHEROW

**Explanations of Coliform Analysis:**

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
