PWS - Colilert Profile

Method: SM 9223B

| Analyte        | Test Result | Unit | Conclusion | Date Tested |
|----------------|-------------|------|------------|-------------|
| Total Coliform | Not Tested  |      |            |             |
| E. coli        | Not Tested  |      |            |             |

Note: Analyte(s) 'Unsatisfactory' because exceeded EPA allowable holding time.

Report Date: 10/07/2026

Reported By: **DNEWBORN**

Explanations of Coliform Analysis:

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
